Why choose skincare with cocoa butter?

Cocoa butter is an oily substance that's extracted from cocoa beans—the same cocoa beans that are used to make chocolate! Cocoa butter benefits the skin because it's a great emollient, which means it works to moisturize deep down to keep skin **soft** and **supple**. Its thick consistency makes it **ideal for keeping skin moisturized in winter**. Cocoa butter is also perfect for areas prone to especially dry, rough skin like the elbows, knees and heels. All this makes cocoa butter a great addition to cosmetic skincare regimens, whether you're using a pure cocoa butter lotion or a lotion made with cocoa butter and other ingredients.
